

Bootstrap

Class and grid structure in
Bootstrap

Bootstrap Grid System

- Bootstrap's grid system allows up to 12 columns across the page.
- 12 columns can be used individually, or can be grouped together to create wider columns
- Bootstrap's grid system is responsive, and the columns will re-arrange automatically depending on the screen size

Grid Classes

The Bootstrap 3 grid system has four classes:

- xs (for phones - screens less than 768px wide)
- sm (for tablets - screens equal to or greater than 768px wide)
- md (for small laptops - screens equal to or greater than 992px wide)
- lg (for laptops and desktops - screens equal to or greater than 1200px wide)

The Bootstrap 4 grid system has five classes:

- .col- (extra small devices - screen width less than 576px)
- .col-sm- (small devices - screen width equal to or greater than 576px)
- .col-md- (medium devices - screen width equal to or greater than 768px)
- .col-lg- (large devices - screen width equal to or greater than 992px)
- .col-xl- (xlarge devices - screen width equal to or greater than 1200px)
- The classes above can be combined to create more dynamic and flexible layouts

Basic Structure of a Bootstrap 4 Grid

`<!-- Control the column width, and how they should appear on different devices -->`

```
<div class="row">
  <div class="col-*-*"></div>
  <div class="col-*-*"></div>
</div>
<div class="row">
  <div class="col-*-*"></div>
  <div class="col-*-*"></div>
  <div class="col-*-*"></div>
</div>
```

- create a row (`<div class="row">`).
- Then, add the desired number of columns (tags with appropriate `.col-*-*` classes).
- The first star (*) represents the responsiveness: sm, md, lg or xl, while the second star represents a number, which should add up to 12 for each row.

`<!-- Or let Bootstrap automatically handle the layout -->`

```
<div class="row">
  <div class="col"></div>
  <div class="col"></div>
  <div class="col"></div>
</div>
```

- Instead of adding a number to each col, let bootstrap handle the layout, to create equal width columns: two "col" elements = 50% width to each col. three cols = 33.33% width to each col. four cols = 25% width, etc.
- You can also use `.col-sm|md|lg|xl` to make the columns responsive

Click me

Bootstrap 4 Default Settings

- Bootstrap 4 uses a default font-size of 16px, and its line-height is 1.5.
- The default font-family is "Helvetica Neue", Helvetica, Arial, sans-serif.
- In addition, all `<p>` elements have `margin-top: 0` and `margin-bottom: 1rem` (16px by default).

`<h1>` - `<h6>`

Bootstrap 4 styles HTML headings (`<h1>` to `<h6>`) with a bolder font-weight and an increased font-size

Click me

Display Headings

- Display headings are used to stand out more than normal headings (larger font-size and lighter font-weight), and there are four classes to choose from: `.display-1`, `.display-2`, `.display-3`, `.display-4`

Click me

Bootstrap 4 Default Settings

`<small>`

In Bootstrap 4 the HTML `<small>` element is used to create a lighter, secondary text in any heading:

Click me

`<mark>`

Bootstrap 4 will style the HTML `<mark>` element with a yellow background color and some padding:

Click me

`<abbr>`

Bootstrap 4 will style the HTML `<abbr>` element with a dotted border bottom:

Click me

`<blockquote>`

Add the `.blockquote` class to a `<blockquote>` when quoting blocks of content from another source:

Bootstrap 4 Text Colors and background color

- Bootstrap 4 has some contextual classes that can be used to "bring through colors".
- The classes for text colors are: `.text-muted`, `.text-primary`, `.text-success`, `.text-info`, `.text-warning`, `.text-danger`, `.text-secondary`, `.text-white`, `.text-dark`, `.text-body` (default body color/often black) and `.text-light`:
- You can also add 50% opacity `.text-black-50` or `.text-white-50` classes:

Background Colors

- The classes for background colors are: `.bg-primary`, `.bg-success`, `.bg-info`, `.bg-warning`, `.bg-danger`, `.bg-secondary`, `.bg-dark` and `.bg-light`.
- Note that background colors do not set the text color, so in some cases you'll want to use them together with a `.text-*` class.

Bootstrap 4 Jumbotron and Images

- A jumbotron indicates a big grey box for calling extra attention to some special content or information.
- Full-width Jumbotron
- If you want a full-width jumbotron without rounded borders, add the `.jumbotron-fluid` class and a `.container` or `.container-fluid` inside of it:

Click me

- Rounded Corners- The `.rounded` class adds rounded corners to an image
- Circle- The `.rounded-circle` class shapes the image to a circle
- Thumbnail- The `.img-thumbnail` class shapes the image to a thumbnail (bordered)

- Image alignment- Center an image by adding the utility classes `.mx-auto` (margin: auto) and `-block` (display: block) to the image
- `.float-right` and `.float-left` can be used to align the images respectively

Bootstrap 4 Responsive Images

- Images come in all sizes. So do screens. Responsive images automatically adjust to fit the size of the screen.
- Create responsive images by adding an **.img-fluid** class to the `` tag. The image will then scale nicely to the parent element.
- The **.img-fluid** class applies `max-width: 100%;` and `height: auto;` to the image:

Bootstrap 4 Basic Tables

- A basic Bootstrap 4 table has a light padding and horizontal dividers.
- The **.table** class adds basic styling to a table

[Click me](#)

Firstname	Lastname	Email
John	Doe	john@example.com
Mary	Moe	mary@example.com
July	Dooley	july@example.com

- Striped Rows- The **.table-striped** class adds zebra-stripes to a table:

July	Dooley	july@example.com

Bootstrap 4 Basic Tables

Click me

- Bordered Table- The `.table-bordered` class adds borders on all sides of the table and cells:

Firstname	Lastname	Email
John	Doe	john@example.com
Mary	Moe	mary@example.com
July	Dooley	july@example.com

- Hover Rows- The `.table-hover` class adds a hover effect (grey background color) on table rows:

Click me

- Black/Dark Table- The `.table-dark` class adds a black background to the table:

- Dark Striped Table-Combine `.table-dark` and `.table-striped` to create a

 table:

Click me

Bootstrap 4 Basic Tables

- Hoverable Dark Table- The `.table-hover` class adds a hover effect (grey background color) on table rows:

- Borderless Table- The `.table-borderless` class removes borders from the table:

- Contextual Classes- Contextual classes can be used to color the whole table (`<table>`), the table rows (`<tr>`) or table cells (`<td>`).

Bootstrap 4 Button Styles

- Bootstrap 4 provides different styles of buttons:
 1. Button elements
 2. Button outline
 3. Button sizes
 - i. Large
 - ii. Default
 - iii. Small
 4. Block level button
 - i. Block level buttons
 - ii. Large block level buttons
 - iii. Small block level buttons

Bootstrap 4 Button Styles

5. Button states

- i. Primary button
- ii. Active primary button
- iii. Disabled primary button
- iv. Disabled link

6. Spinner buttons

- i. Spinner border
- ii. Spinner grow

-- spinner buttons are designed using two tag

`<button>` tag with **btn-primary** class attribute

`` tag with **spinner-border** and **spinner-grow** class attribute

Note to students: try to explore spinner in detail.

Click me

Bootstrap 4 Badges

- Badges are used to add additional information to any content.
- Use the `.badge` class together with a contextual class (like `.badge-secondary`) within `` elements to create rectangular badges.
- Note that badges scale to match the size of the parent element (if any)
- Contextual Badges- Use any of the contextual classes (`.badge-*`) to change the color of a badge
- Pill Badges- Use the `.badge-pill` class to make the badges more round
- Badge inside an Element- An example of using a badge inside a button

Click me

Bootstrap 4 Progress Bars

- Basic Progress Bar- A progress bar can be used to show a user how far along he/she is in a process.
- To create a default progress bar, add a `.progress` class to a container element and add the `.progress-bar` class to its child element.
- Use the CSS width property to set the width of the progress bar
- The height of the progress bar is 16px by default.
- Use the CSS height property to change it. Note that you must set the same height for the progress container and the progress bar
- Progress Bar Labels- Add text inside the progress bar to show the visible percentage

Bootstrap 4 Progress Bars

- Colored Progress Bars-By default, the progress bar is blue (primary). Use any of the Bootstrap 4 contextual background classes to its color
- Striped Progress Bars-Use the `.progress-bar-striped` class to add stripes to the progress bars
- Animated Progress Bar-Add the `.progress-bar-animated` class to animate the progress bar
- Multiple Progress Bars- Progress bars can also be stacked
