JavaScript

Go, change the world

JavaScript

A scripting language is a lightweight programming language. *Scripting*
JavaScript is a scripting language designed primarily for
adding interactivity to Web pages and creating Web
applications.

Origins of JavaScript

fritzing

Originally developed by Netscape, as LiveScript
Became a joint venture of Netscape and Sun in 1995,
renamed JavaScript

Now standardized by the European Computer
Manufacturers Association as ECMA-262

An HTML-embedded scripting language

We'll call collections of JavaScript code *scripts*, not
programs

Syntactic Characteristics

Identifier form: begin with a letter or underscore, followed by any number of letters, underscores, and digits

Case sensitive

25 reserved words, plus future reserved words

Comments: both // and /* ... */

Scripts are usually hidden from browsers that do not include JavaScript interpreters by putting them in special comments

```
<!--  
-- JavaScript script -  
//-->
```

JavaScript reserved words

fritzing

Break, delete, function, return, typeof, case, do, if, switch, var, catch, else, in, this, void, continue, finally. instanceof, throw, while, default, for, new, try, with

JavaScript Datatypes

- All primitive values have one of the five types: Number, String, Boolean, Undefined, or Null
- Number, String, and Boolean (**wrapper objects**)
- The purpose of wrapper objects is to provide properties and methods that are convenient for use with values of the corresponding primitive type.

fritzing

String Object

- The number of characters in a string is stored in the **length** property

```
var str = "George";  
var len = str.length;
```

- Common methods:

Method	Parameters	Result
<code>charAt</code>	A number	The character in the <code>String</code> object that is at the specified position
<code>indexOf</code>	One-character string	The position in the <code>String</code> object of the parameter
<code>substring</code>	Two numbers	The substring of the <code>String</code> object from the first parameter position to the second
<code>toLowerCase</code>	None	Converts any uppercase letters in the string to lowercase
<code>toUpperCase</code>	None	Converts any lowercase letters in the string to uppercase

fritzing

Math and Number Objects

- The Math Object provides floor, round, max, min, trig functions, etc.
 - e.g., `Math.cos(x)`
- The Number Object has some useful

fritzing

Property	Meaning
MAX_VALUE	Largest representable number
MIN_VALUE	Smallest representable number
NaN	Not a number
POSITIVE_INFINITY	Special value to represent infinity
NEGATIVE_INFINITY	Special value to represent negative infinity
PI	The value of π

Date Object

fritzing

- Create one with the Date constructor (no params)

```
var today = new Date();
```
- Local time methods of Date:
 - toLocaleString – returns a string of the date
 - getDate – returns the day of the month
 - getMonth – returns the month of the year (0 – 11)
 - getDay – returns the day of the week (0 – 6)
 - getFullYear – returns the year
 - getTime – returns the number of milliseconds since January 1, 1970
 - getHours – returns the hour (0 – 23)
 - getMinutes – returns the minutes (0 – 59)
 - getMilliseconds – returns the millisecond (0 – 999)
